PROFESSIONAL SUMMARY

AWS Cloud Support Engineer (CSE-2) with 5+ years of expertise in designing, operating, and optimizing mission-critical cloud infrastructure for billion-revenue enterprises. Dual AWS SME in EC2 Linux and Elastic Cache with a relentless focus on system reliability, automation, and operational excellence.

Key SRE-Aligned Strengths:

- **Reliability-First Infrastructure:** Architected **99.99%+ uptime systems** through proactive monitoring, alerting, and automated remediation pipelines.
- **Automation Champion:** Reduced **Mean Time to Recovery (MTTR)** by **35%+** via automated runbooks, CI/CD-integrated chaos engineering, and self-healing infrastructure patterns.
- **Observability & Metrics:** Built **Prometheus/Grafana dashboards** for real-time SLO/SLI tracking, achieving sub-second alerting for 95% of critical services.
- **SME Leadership:** Recognized as **AWS SME for EC2 Linux (2024)** and **Elastic Cache (2026)**, mentoring 20+ engineers and driving SRE adoption across teams.
- **Cross-Functional Collaboration:** Partnered with C-suite stakeholders, DevOps, and Development teams to align AWS solutions with strategic business objectives, embedding **blameless post-mortems, error budgeting**, and **continuous delivery practices**.

Technical Mastery: AWS (EC2, Elastic Cache, S3, EBS, VPC, IAM, CloudWatch), Linux/Unix systems, Kubernetes, Terraform, Python/Go scripting, Prometheus/Grafana, and container orchestration.

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - Dublin, Ireland

Cloud Support Engineer -2 (CSE-2), Linux Domain | *Dec 2025 - Present*

- **SME Leadership & Strategic Alignment:** Appointed as **AWS SME for EC2 Linux and Elastic Cache**, collaborated directly with **C-suite stakeholders** to align AWS solutions with enterprise strategic objectives. Drove adoption of **automated remediation pipelines** (AWS Systems Manager Automation) and **chaos engineering workflows** (Gremlin), reducing MTTR by **35%** for critical workloads.
 - **Observability & Business Impact:** Designed **Prometheus/Grafana dashboards** for real-time SLO/SLI tracking (CPU, memory, latency), achieving sub-second alerting for 95% of services. Integrated **CloudWatch Alarms** with automated runbooks to slash incident resolution time by **40%**, directly supporting **99.99% uptime SLAs** for high-traffic customers.
 - **Solution Design & Cost Optimization:** Architected **multi-region, auto-scaling EC2/Kubernetes clusters** and **Elastic Cache clusters**, optimizing costs by **20%** via **Terraform-based IaC**. Reduced infrastructure costs by **25%** through **auto-scaling policies** and **resource right-sizing** while maintaining performance SLAs.
 - **Mentorship & Culture Building:** Trained 20+ engineers and customers on **SRE best practices** (blameless post-mortems, error budgeting), improving team reliability culture and reducing incident recurrence by **30%**. Authored **20+ Knowledge Center articles** on EC2 reliability, Elastic Cache optimization, and SRE frameworks.
 - **Key Achievements:**
 - **95% CSAT** across enterprise accounts; recognized as **Top Performer** in Q1 2026.
 - **Reduced infrastructure costs by 25%** through **auto-scaling** and **spot instance strategies**.
-

Cloud Support Engineer -1 (CSE-1), Linux Domain | *Mar 2023 - Dec 2025*

- **SME Achievement & Technical Advocacy:** Earned **AWS SME in EC2 Linux** recognition for expertise in troubleshooting complex EC2 environments. Partnered with **TAMs and C-suite stakeholders** to align solutions with business goals, reducing escalation time by **50%** through **Bash/Python automation scripts** and **deep-dive performance analysis** (perf, tcpdump).
 - **Automation & CI/CD Integration:** Developed **CI/CD pipelines** (CodePipeline/CodeBuild) to automate **EC2 health checks, log analysis**, and **security patching**, cutting manual effort by **45%**. Pioneered **blameless post-mortems** and **error budgeting** for 3 major accounts, reducing incident recurrence by **35%**.
 - **Cost Optimization & Migration Guidance:** Implemented **auto-scaling groups** and **spot instance strategies** for EC2 and Elastic Cache, saving customers **\$1.2M/year**. Advised 8+ customers on **AWS migration** (EC2, RDS, S3, Elastic Cache), implementing **auto-scaling** and **load balancing** for resilient architectures.
 - **Mentorship:** Guided 10+ junior engineers to **SME certification**, focusing on **Linux troubleshooting, AWS networking**, and **SRE principles**.
 - **Key Achievements:**
 - **98% CSAT** for CSE-1 accounts; promoted to CSE-2 for outstanding performance.
 - **Reduced MTTR by 30%** through **automated runbooks** and **proactive health checks**.
-

Cloud Support Associate, Linux | *Oct 2021 - Mar 2023*

- **Core Support & Customer Success:** Resolved **EC2, S3, VPC networking**, and **Elastic Cache issues** for Linux-based workloads, reducing repeat escalations by **40%** through **documentation playbooks** and **root-cause analysis**. Built **Bash/Python scripts** to automate routine tasks (log parsing, health checks), improving team efficiency by **25%**.
- **Customer Advocacy:** Partnered with engineering to file **15+ feature requests**, enhancing AWS service reliability and customer experience.

Advised customers on **AWS migration** best practices, ensuring alignment with business objectives.

EDUCATION

MBA, Cloud Computing – Dublin Business School, Ireland | *Sep 2018 – Oct 2019*

- Dissertation: *Barriers & Benefits of Cloud Adoption in Manufacturing SMEs*
- Project: Built an **E-Commerce website** for British Petroleum (BP) with financial analysis.

CERTIFICATIONS

- **AWS Solutions Architect - Associate** (2025)
- **AWS Certified Cloud Practitioner** (2020)
- **Linux Bootcamp (Advanced System Administration)** (2020)
- **Chaos Engineering Principles** (2024)
- **Terraform Associate** (2024)
- **AWS SME - EC2 Linux** (2024)
- **AWS SME - Elastic Cache** (2026)

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, **Elastic Cache**, S3, EBS, VPC, IAM, CloudWatch, Systems Manager, Migration Services)
- **Infra as Code:** Terraform, AWS CloudFormation
- **Containers:** Kubernetes, Docker
- **Monitoring:** Prometheus, Grafana, CloudWatch, Datadog
- **Automation:** Bash, Python, Ansible
- **Observability:** Chaos Engineering (Gremlin), SLO/SLI design
- **Networking:** TCP/IP, DNS, VPN, Load Balancing, Route 53
